

Inclusion

Inclusion in education is an approach to educate students with special needs. These students spend most of their time in classroom. We believe that all children have the potential to learn and grow, the ability to respond to the culture and socio-economic needs of the students. The ability to support positive behaviour in and outside the classroom. A dedication in seeing each child as an individual the modification of curriculum & activities to include all students. Inclusive Education means combining of *philosophy and pedagogy* with the aim of ensuring that no child, however different from expectations and general norms, feels alienated and inadequate. Children, as they grow, deal with their own stress, pressures and anxieties- some real, some imaginary. We provide counseling services to help our students understand themselves better and to deal with their life situations. There is a trained and experienced counselor to cater to the needs of the children and adolescents. Counselling is absolutely confidential and parents are free to get in touch with the counsellor regarding any issue that worries them. We believe that each child must feel confident of himself or herself and his or her abilities and capacities, respected and wanted for what he or she is and therefore feels safe and secure. Apart from handling

emotional issues that may stem from the school, home or peer group, we also help the students to make career choices.
