SECTION – A (READING – 10 MARKS)

A.1 Read the following paragraph and answer the questions that follow:

Sharks have prowled the seas for about 400 million years. Their size, power and great toothy jaws fill us with fear and fascination. A few kinds of sharks such as great white sharks attack the swimmers but most of them stay away from people. Most of the sharks eat other sharks.

Sharks are fish but they don't have bones. Instead, a shark's skeleton is made up of a rubbery bone material. The rubbery material is called cartilage and its tiny toothed shaped scales are called denticles.

Sharks use their eyes, ears and sense of smell to hunt food. All the animals create a small field of electricity around them. Sharks sense this electricity through special tubes in their heads as they have an unusual sense.
