

O. P. JINDAL SCHOOL, RAIGARH (CG) 496 001, INDIA

Phone: 07762-227042, 227293, (Extn. 227001 - 49801, 02, 04, 06, 09); Fax: 07762-262613; website: www.opjsrgh.in; e-mail: opjsraigarh@jspl.com

CLASS: XI-ECONOMICS

1. State any three benefits of Institutional sources of credits.
2. Explain the role of micro credit in meeting credit requirements of the poor,
3. Discuss the role of National Banks of Agricultural and Rural Development (NABARD) in rural credit.
4. Enlist some of the problems faced by farmers during the initial years of organic farming
5. Is it necessary to generate employment in the formal sector rather than in the informal sector?
6. Discuss in brief the distribution of employment in different sectors of economy on the basis of gender.
7. Discuss the various remedial measures, which are needed to solve the problem of unemployment in India
8. What do you mean by employment? Discuss the two main forms of employment.
9. Briefly discuss the various causes of unemployment.
- 12 The mode and mean are 26.6 and 28.1 respectively in an asymmetrical distribution. Find the value of median.
- 13 Two samples of size 100 and 150 respectively have means 50 and 60 and standard deviations 5 and 6. Find the mean and standard deviation of the combined sample of size 250.
- 14 Write short notes on
 - a. Educated Unemployment
 - b. Open Unemployment
 - c. Cyclical Unemployment,
- 15 Find Range and coefficient of range of the following:
 - a. 60,72,36,85,35,52,72.
- 16 Calculate the mean deviation of the following frequency distribution

Marks	7	8	9	10	11	12	13	14	15	16	17
No of students	2	3	6	12	20	24	25	7	5	3	1

- 17 Find out Quartile deviation and Coefficient of Quartile Deviation for the following data

Marks	7	8	9	10	11	12	13	14	15	16	17
No of students	2	3	6	12	20	24	25	7	5	3	1

- 18 The coefficient of variation of a series is 58. The standard deviation is 21.2. What is the arithmetic mean?

19 If the mean and standard deviation of 75 observations is 40 and 8 respectively find the new mean and standard deviation of

- a. Each observation is multiplied by 5
- b. 7 is added to each observation

20 Sum of 8 values is 64 and sum of their squares is 880. Find the coefficient of variation.

21 Draw a Lorenz curve from the following data

Income	100	200	400	500	800
No of persons	80	70	50	30	20

22 Calculate coefficient of variation of given series

Marks(more than)	0	10	20	30	40	50	60	70
No of students	100	90	75	50	20	10	5	0

23 Why labor force participation is low in India? Suggest some remedial measures.

24 Give three sources that collect data on unemployment.

25 Calculate standard deviation and its coefficient by direct method.

Marks	0-10	10-20	20-30	30-40	40-50
No of students	4	3	6	5	2
