

Secondary (IX – XII)

OPJS conforms to the multidisciplinary and holistic curriculum specifically designed by CBSE and encourages prodigies for conceptual understanding, creativity and critical thinking. The teachers mostly play the role of mentors -infusing hands-on learning, story-telling-based pedagogy to instill deeper understanding with critical analysis, comparing, contrasting and evaluating. Students are trained to face the outer world with confidence and integrate their social, emotional and intellectual growth to make better decisions in their personal growth.

Students are ready to plunge in the outer world with their competency and skills, and this becomes important to ensure flexibility- including subjects in physical education, the arts and crafts and vocational skills; so that they can design their own paths of study and life. There is no hard separation between ‘vocational’ or ‘academic’ streams and learner has to choose the learning experience as per his/her interests and abilities. Teachers as guides, facilitate students like co-learner and promote peer-learning and individuality. Research based, technology integrated, practical learning, using active learning methods is incorporated to prepare goal-oriented, market competitive progressive citizens of the country.
