- Analogy can be explained as a similarity between things in some respects that are otherwise dissimilar.
- It can be regarded as comparison made between two or more things in order to show their similarity.
- It can also be explained as a similarity between like features of two things (which are otherwise unlike) on which a comparison may be based.
- So, it can be deduced that **Analogy** is a form of reasoning in which one thing is inferred to be similar to another thing in a certain respect, on the basis of known similarities.

Illustration:

1. Dog : Rabies :: Mosquito : Malaria

Explanation: Second word is the disease caused by the bite of first word.

2. Moon : Satellite :: Earth : Planet

Explanation: First word belongs to the category of second word.

**MENTAL ABILITY TEST (MAT)-VII**  
**CLASSIFICATION**  
**BASIC CONCEPTS**

Name: \_\_\_\_\_ Class: \_\_\_\_\_ Date: \_\_\_\_\_

---

- Classification means to separate/ assort the items of a given group on the basis of certain common qualities they possess and then spot the stranger or odd one out.
- In this test, you are given a group of certain items, out of which all except one are similar to one another in some manner. You have to choose this one item which does not fit into the given group.
- These tests judge your ability to observe differences and similarities among various items. You must determine the similarity of characteristics in the given terms and then identify the one which does not have same characteristics.
- These characteristics can be based on relationship, repetition and skipping pattern relationship, letter formation relationship, squares and cubes, etc.

For eg.

Find the odd one out:

1. a. Potato    b. Tomato    c. Gourd    d. Brinjal    e. Cucumber

**Ans: a** - as potato is the only one that grows underground

2. a. 1:1        b. 2:4        c. 5:25        d. 9: 81        e. 3: 27

**Ans: e** – Second number is square of first except in option d.

**MENTAL ABILITY TEST (MAT)-VII**  
**ALPHABET TEST**  
**BASIC CONCEPTS**

**Directory**

- **Alphabetical Order:** Arranging words in alphabetical order implies ‘to arrange them in the order as they appear in a dictionary’, i.e. as per the order in which the beginning letters of these words appear in the English alphabet.
- **How to arrange the words in alphabetical order?**
  - i) First arrange according to the first letter.
  - ii) If first letter is same of the given words, then consider second letter.
  - iii) If both the first and second letters are same, then arrange the words considering their third letter and so on.
- After learning this section it will be easier for students to use dictionary, index sheets, etc.

**Alphabetical Quibble**

- In this type of question, generally a letter series is given, be it English alphabets from A to Z or a randomized sequence of letters.
- Students are required to trace the letters satisfying certain given conditions as regards their position in the given sequence or the sequence obtained by performing certain given operations on the given sequence.

**BASIC CONCEPTS**

---

1. **Alphanumeric** is a combination of alphabetic and numeric characters.
2. In this type of questions, a jumbled sequence of some letters, numbers and symbols is given, followed by certain questions based on it.
3. Students have to study the given terms be it letters, numbers or symbols in relation to their location in the given sequence, and not as per their status in English alphabet or Indian number system.
4. This topic will enhance students' understanding of the placing of elements in the certain given order and trace the required element as per the instructions given in the question.
5. After learning this topic, student's understanding of terms precede, follow, followed by, middle, end, etc. will be enhanced.

**For eg.**

**Directions (Questions 1-3): Study the following arrangement carefully and answer the questions given below:**

**R E 5 D A P \$ 3 T I Q 7 9 B # 2 K % U 1 M W 4 \* J 8 N**

1. Which of the following is exactly in the middle between 3 and 1 in the above arrangement?  
a. B            b. K            c. 9            d. #            e. None of these

**Ans:** b (there are 11 elements between 3 and 1. So the middle letter will be sixth one).

2. How many such vowels are there in the above arrangement, each of which is immediately followed by a number but not immediately preceded by a consonant?  
a. None            b. One            c. Two            d. Three            e. Four

**Ans:** b

3. Which of the following is seventh to the left of the sixteenth from the left in the above arrangement?  
a. A            b. U            c. 4            d. T            e. None of these

**Ans:** d (sixteenth element from left is 2, and the element 7 steps to the left of 2 is T)

**BASIC CONCEPTS**

---

**Type I: Number Test**

1. In this type of questions, a set, group or series of numbers is given and the student is asked to trace out numbers following the given conditions.
2. Numbers lying at specific mentioned positions after shuffling according to a given pattern may also be asked.

**Eg:** In the given series, how many 8's are there each of which is exactly divisible by its immediate preceding as well as succeeding numbers?

2 8 3 8 2 4 8 2 4 8 6 8 2 8 2 4 8 3 8 2 8 6

- a. One      b. Two      c. Three      d. Four      e. None of these

**Ans: b- Explanation:** 2 8 3 8 2 4 8 2 4 8 6 8 2 8 2 4 8 3 8 2 8 6

**Type II: Ranking Test**

1. Ranking related questions includes the rank of the person from the top, from the bottom and the total number of persons.
2. Out of the above three information, any information may be missing and students are asked the same.

**Eg:** Rohan ranks seventh from the top and twenty-sixth from the bottom in a class. How many students are there in the class?

- a. 31      b. 32      c. 33      d. 34      e. 35

**Ans: b- Explanation:** 6 students before Rohan+Rohan+25 after Rohan= 32

**Type III: Time Sequence Test**

1. In this type of questions, certain information regarding a particular date or time is given and students are required to find out that exact date or time.

**Eg:** Nitin correctly remembers that Nidhi's birthday is before Friday but after Tuesday. Dheeraj correctly remembers that Nidhi's birthday is after Wednesday but before Saturday. On which of the following days does Nidhi's birthday definitely fall?

- a. Monday      b. Tuesday      c. Wednesday      d. Thursday

**Ans: d- Explanation:** According to Nitin, Nidhi's birthday falls on Wednesday or Thursday -----(i)  
According to Dheeraj, Nidhi's birthday falls on Thursday or Friday----- (ii)  
From (i) and (ii), Nidhi's birthday falls on Thursday.

**ORDERING, RANKING & TIME SEQUENCE TEST**  
**WORKSHEET-2**

**Type I: Number Test**

1. In the following list of numerals, how many 2's are there each of which is followed by 1 but not preceded by 4?

4 2 1 2 1 4 2 1 1 2 4 4 4 1 2 2 1 2 1 4 4 2 1 4 2 1 2 1 2 4 1 4 2 1 2 4 1 4 6

- a. Two                      b. Three                      c. Four                      d. Five                      e. None

2. How many 3's are there in the following sequence which are neither preceded by 6 nor immediately followed by 9?

9 3 6 6 3 9 5 9 3 7 8 9 1 6 3 9 6 3 9

- a. One                      b. Two                      c. Three                      d. Four                      e. None of these

3. Count each 1 in the following sequence of numbers that is immediately followed by 2, but 2 is not immediately followed by 3. How many such 1's are there?

1 2 1 3 4 5 1 2 3 5 2 1 2 6 1 4 5 1 1 2 4 1 2 3 2 1 7 5 2 1 2 5

- a. 2                      b. 4                      c. 5                      d. 7                      e. 9

**Directions (Q 4-5):** Study the number series given below and answers the questions that follow.

7 8 9 7 6 5 3 4 2 8 9 7 2 4 5 9 2 9 7 6 4 7

4. How many 7's are preceded by 9 and followed by 6?  
a. 2                      b. 3                      c. 4                      d. 5                      e. None of these
5. Which figures have equal frequency?  
a. 2,5,3                      b. 2,4,5                      c. 3,7,5                      d. 8,6,5                      e. None of these

**Directions (Q 6-8):** Study the number series given below and answers the questions that follow.

5 1 4 7 3 9 8 5 7 2 6 3 1 5 8 6 3 8 5 2 2 4 3 4 9 6

6. How many odd numbers are there in the sequence each of which is immediately followed by an odd number?  
a. 1                      b. 2                      c. 3                      d. 4                      e. More than 4
7. How many even numbers are there in the sequence which are immediately preceded by an odd number but immediately followed by an even number?  
a. 1                      b. 2                      c. 3                      d. 4                      e. More than 4
8. How many odd numbers are there in the sequence which are immediately preceded and also immediately followed by an even number?  
a. 1                      b. 2                      c. 3                      d. 4                      e. More than 4

9. How many 8's are there in the following number series each of which is exactly divisible by its immediately preceding and also divisible by immediately following numbers?

8 2 4 5 1 7 2 8 4 8 4 2 2 8 2 6 9 8 4 5 4 8 3 2 8 4 3 1 8 3

- a. 1                      b. 2                      c. 3                      d. 4                      e. None of these
10. A number is greater than 3 but less than 8. Also, it is greater than 6 but less than 10. The number is?  
a. 5                      b. 6                      c. 7                      d. 8                      e. 9

**Type II: Ranking Test**

11. A class of boys stands in a single line. One boy is nineteenth in order from both the ends. How many boys are there in the class?  
a. 27                      b. 37                      c. 38                      d. 39                      e. 40
12. If Atul finds that he is twelfth from the right in a line of boys and fourth from the left, how many boys are there in the line?  
a. 12                      b. 13                      c. 14                      d. 15                      e. None of these
13. Nitin ranks eighteenth in a class of 49 students. What is his rank from the last?  
a. 18                      b. 19                      c. 31                      d. 32                      e. None of these
14. Manoj and Sachin are ranked seventh and eleventh respectively from the top in a class of 31 students. What will be their respective ranks from the bottom in the class?  
a. 20<sup>th</sup> & 24<sup>th</sup>                      b. 24<sup>th</sup> & 20<sup>th</sup>                      c. 25<sup>th</sup> & 21<sup>st</sup>                      d. 26<sup>th</sup> & 22<sup>nd</sup>
15. Raman is sixth from the left end and Vineet is tenth from the right end in a row of boys. If there are ten boys between Raman and Vineet, how many boys are there in the row?  
a. 23                      b. 24                      c. 25                      d. 26                      e. None of these
16. Some boys are sitting in a row. P is sitting fourteenth from the left and Q is seventh from the right. If there are four boys between P and Q, how many boys are there in the row?  
a. 25                      b. 23                      c. 21                      d. 19                      e. None of these
17. A class of boys stands in a single line, one boy is 19th in order from both the ends, how many boys are there in the class?  
a. 37                      b. 39                      c. 27                      d. 38                      e. None of these
18. In a row of thirty boys, R is fourth from the right end and W is tenth from the left end. How many boys are there between R and W?  
a. 15                      b. 16                      c. 17                      d. 18                      e. Can't be determined
19. Murugan ranked ninth from the top and thirty eighth from the bottom in a class. How many students are there in the class?  
a. 44                      b. 45                      c. 46                      d. 47                      e. None of these
20. In a class of 50 students M is eighth from top. H is 20th from bottom. How many students are there between M and H?  
a. 22                      b. 23                      c. 24                      d. 25                      e. Can't be determined

**Type III: Time Sequence Test**

21. Sangeeta remembers that her father's birthday was certainly after eighth but before thirteenth of December. Her sister Natasha remembers that their father's birthday was definitely after ninth but before fourteenth of December. On which date was their father's birthday?
- a. 10<sup>th</sup>                      b. 11<sup>th</sup>                      c. 12<sup>th</sup>                      d. Data inadequate
22. Ajay left home for the bus stop 15minutes earlier than usual. It takes 10 minutes to reach the stop. He reached the stop at 8:40 a.m. What time does he usually leave home for the bus stop?
- a. 8:30a.m.                      b. 8:45p.m.                      c. 8:55a.m.                      d. None of these
23. The priest told the devotee, "The temple bell is rung at regular intervals of 45 minutes. The last bell was rung 5 minutes ago. The next bell is due to be rung at 7:45a.m." At what time did the priest give this information to the devotee?
- a. 7:40a.m.                      b. 7:05 a.m.                      c. 7:00 a.m.                      d. 6:55a.m.
24. How many days will be there from 26th January 2008, to 15th may 2008(both days are included)?
- a. 111                      b. 112                      c. 110                      d. 113
25. If the day before yesterday was Thursday, when will Sunday be?
- a. Tomorrow                      b. Today                      c. Day after tomorrow                      d. None
26. If day after tomorrow is Saturday, what day was 3 days before yesterday?
- a. Monday                      b. Sunday                      c. Tuesday                      d. Thursday
27. If the day before yesterday was Saturday, what day will fall on the day after tomorrow?
- a. Friday                      b. Thursday                      c. Wednesday                      d. Tuesday
28. If the 3<sup>rd</sup> day of a month is Tuesday, which of the following would be 23<sup>rd</sup> day of that month?
- a. Tuesday                      b. Monday                      c. Wednesday                      d. Sunday
29. Nitin correctly remembers that Nidhi's birthday is before Friday but after Tuesday. Dheeraj correctly remembers that Nidhi's birthday is after Wednesday but before Saturday. On which of the following days does Nidhi's birthday definitely fall?
- a. Monday                      b. Tuesday                      c. Wednesday                      d. Thursday
30. If Tuesday falls on 4th of month, then which day will fall three days after the 24th?
- a. Monday                      b. Tuesday                      c. Friday                      d. Thursday

## MENTAL ABILITY TEST (MAT)-VII LOGICAL SEQUENCE OF WORDS BASIC CONCEPTS

---

1. In this type of questions, certain interrelated words are given and numbered, followed by various sequences of the numbers denoting them, as alternatives.
2. Students are required to arrange these words in a logical sequence based on a common property and then choose the correctly numbered sequence from the given alternatives.
3. In other words, in this type of question, some words are given. You have to arrange these words in a meaningful order. The order may be according to age, size and need etc.
4. You have to arrange them in the order/sequence they occur/happen in real life.

For eg.

1. Arrange the following in a logical/meaningful sequence:

- |              |              |              |              |              |
|--------------|--------------|--------------|--------------|--------------|
| 1. Birth     | 2. Death     | 3. Funeral   | 4. Marriage  | 5. Education |
| a. 1,3,4,5,2 | b. 1,5,4,2,3 | c. 2,3,4,5,1 | d. 4,5,3,1,2 |              |

Ans. B

Explanation: The given words has to be arranged in the order of various events as they occur in a man's life.

2. Arrange the following in a logical/meaningful sequence:

- |                 |              |              |              |             |
|-----------------|--------------|--------------|--------------|-------------|
| 1. Consultation | 2. Illness   | 3. Doctor    | 4. Treatment | 5. Recovery |
| a. 2,3,1,4,5    | b. 2,3,4,1,5 | c. 4,3,1,2,5 | d. 5,1,4,3,2 |             |

Ans. A

Explanation: **Illness** occurs first. One then goes to a **doctor** and after **consultation** undergoes **treatment** to finally attain **recovery**.

## MENTAL ABILITY TEST (MAT) -VII MATHEMATICAL OPERATIONS BASIC CONCEPTS

1. This topic deals with questions on simple mathematical operations.
2. Here, the four fundamental operations – addition, subtraction, multiplication and division are represented by symbols different from the usual ones.
3. The questions involving these operations are set using artificial symbols. The student has to substitute the real signs and solve the questions accordingly, to get the answer.
4. While solving a mathematical expression, proceed according to the rule BODMAS- i.e. **B**rackets, **O**f, **D**ivision, **M**ultiplication, **A**ddition, and **S**ubtraction.

### Type I: Problem solving by substitution

In this type, you are provided with substitutes for various mathematical symbols or numerals, followed by a question involving calculation of an expression.

The student is required to put in the real signs or numerals in the given equation and then solve the questions as required.

For e.g.-If '+' means 'minus', 'x' means 'divided by', '÷' means 'plus' and '-' means 'multiplied by', then which of the following will be value of the expression  $252 \times 9 - 5 + 32 \div 92$  ?

- a. 95                      b. 168                      c. 192                      d. 200                      e. None of these

Ans: d **Explanation:** Putting the proper signs in the given expression, we get:

$$252 \div 9 \times 5 - 32 + 92 = 28 \times 5 - 32 + 92 = 140 - 32 + 92 = 232 - 32 = 200.$$

### Type II: Interchange of signs and numbers.

In this type, interchanges are made in signs and numbers.

The student is required to make the interchanges in signs and numerals and then solve the question or choose the correct/incorrect equation.

Students may also be asked to choose the appropriate interchanges to make given expression correct.

For e.g.-If the given interchanges namely: signs + & ÷ and numbers 2 & 4 are made in signs and numbers, which one of the following four equations would be correct?

- a.  $2+4 \div 3=3$                       b.  $4+2 \div 6=1.5$                       c.  $4 \div 2+3=4$                       d.  $2+4 \div 6=8$

Ans. D-**Explanation:** Interchanging (+ & ÷) and (2 & 4), we get

a.  $4 \div 2+3 = 3$  or  $5 = 3$ , which is false.                      b.  $2 \div 4+6 = 1.5$  or  $6.5 = 1.5$ , which is false.

c.  $2+4 \div 3 = 4$  or  $\frac{2+4}{3} = 4$ , which is false.                      d.  $4 \div 2+6 = 8$  or  $8 = 8$ , which is true.

**MENTAL ABILITY TEST (MAT)-VII**  
**VENN DIAGRAMS**  
**BASIC CONCEPTS**

1. A Venn diagram (also known as set diagram or logic diagram) is a diagram that shows all possible logical relations between the given elements.
2. In this type of test, a diagram is made and according to the question data is filled in the diagram.
3. After filling the data, student has to analyse that by which diagram a particular set of elements can be best represented.
4. This topic deals with questions which judge student's ability to relate a certain given group of items and depict it by diagram.

Basic types of Venn diagrams:

1. All items belong to three different groups: eg. A- Doctors, B-Engineers, C-Lawyers

2. If one item belongs to the class of second and the second belongs to the class of third. Eg. A-Seconds, B-Minutes, C-Hours

3. If two separate items belong to the class of third. Eg. A-Table, B-Chair, C-Furniture

4. If two items belong to the class of third such that some items of each of these groups are common. Eg. A-Fathers, B-Brothers, C-Males

5. If two items are partly related to the third but are themselves independent of each other. Eg. A- Dogs, B-Pets, C-Cats

6. If three items are partly related to each other. Eg. A-Peons, B-Government Employees, C- Educated Persons.

7. If one item belongs to the class of second while third is entirely different from the two. Eg. A- Engineers, B-Human Beings, C- Rats

B

8. If one item belongs to the class of second and the third item is partly related to these two. Eg. A-Females, B-Mothers, C-Doctors

9. If one item belongs to the class of second and the third item is partly related to the second. Eg. A-Fathers, B-Males, C-Children

10. If two items are partly related to each other and the third item is entirely different from the two. Eg. A-Professor, B-Author, C-Children
