

Class Notes

Class:

II

Topic:

AIR

Subject:

Activity

Note: To be done in your Activity copy

* Air is all around us.

* Air is a mixture of gases.

* Moving air is called wind.

* The layer of air around earth surface is known as atmosphere.

* We cannot live without air. Even animals and plants need air for living.

* We need it for breathing.

* We use it for burning things, transportation sports and producing electricity.

The above content is absolutely prepared from home.
