

INTERNATIONAL PROJECTS

Potpourri

S.K. Sena School, Malaysia &
SRK Stella Maris, Malaysia

'Potpourri' was initiated primarily with the motive of acquainting the students with the rich Indian medical system based upon herbs which originated as early as 1000 B.C. In the course of the project the students unravelled the mysteries of the spice-world & its early uses connected with magic, medicine, religion, tradition & preservation. It needed an extensive research on the part of the students to explore the world of spices which has a mention even in the ancient Biblical stories & our very own Indian epic 'Ramayana'. Thus 'Potpourri' encapsulated a wide range of subject & content areas in a nutshell.

Go Green

Beykent School Istanbul, Turkey

This programme provided us the golden opportunity, to enhance our tiny tots' knowledge about the environment through the project 'Go green' and helped them to experience and journey, a pedagogy which helped the children to learn about the healthy eating habits, agriculture, the soil and learn more about our partner country.

Children enjoyed each and every activity concerned with the project like sowing the seeds, watering the baby plants and taking care of the plants etc. It was a worthy learning experience for students and teachers.

Good Health – a bliss

**Sk Behor Empiang, Jalan Abi
Tok Hashim, Perlis, Malaysia**

Good Health is a boon. This fact remains tangible. Good healthy habits form the entire life of a man. Through this project, the students are expected to be aware of the ways to stay healthy through exercise, balanced diet and healthy habits. This project also gives scope to the students to study about various techniques like yoga, meditation, aerobics, dance, swimming and many other sports and games. The students develop insight through the activities conducted in the school and learn to stay away from harmful drugs and other intoxicants.

The Green School

**Abbey Grange Church of
England Academy Leeds, UK**

‘Green School’ at O.P. Jindal school is aimed to nurture independence, creativity and consideration in our growing children. We incorporate multitasking activities by including combo subjects as Science, Maths, Language, IT and Arts. We believe in encouraging different learning styles and inspire our students to be self motivated and enthusiastic participants in their education. Our school ensures adequate resources for a clean and healthy environment. Our school believes that “a school can create leaders in environmental sustainability, giving students the tools to be innovators by giving them a healthy environment to learn and play. We believe it is essential to protect childrens health- at school and in the world beyond school.

**Junk food a poison on global
rampage & Food fest**

**ESCUELA SECUNDARIA N
DEGREE 37 ARANA
ARGENTINA**

With the aim of carving out a healthy generation we the members of the OPJS pledge to create global awareness against the fast food and develop an inclination towards the home-cooked healthy food. Our active students of both the partner schools are on the noble mission of creating the awareness. Everyone around the world should know that junk food is a pejorative term for food containing high levels of calories from sugar or fat with little protein vitamins and minerals. We must stand together to fight against the system of fast food or junk food and to create a healthy life. Health awareness encouraged at an early age assures growth in a healthy environment of self esteem and self awareness necessary to build a healthy society.

Flora & Fauna

**IED JOSE MARIA CARBONELL
BAGOTA, COLOMBIA**

The environmental context of a city makes learning about it more engaging. Our students have embarked upon a new learning experience through the project Flora & Fauna. This project will allow the students to share their views regarding animals and plants and our planet with our partner country. Under this project students will enthusiastically participate in various activities, such as making of scrapbook consisting of Flora and Fauna of Colombia and India, display board decoration, collection of different nests.

Cutlery Makes a difference

**ESCUELA PRIMARIA LUIS
HIDALGO MONROY, MEXICO**

The international journey is truly one of self discovery and relationships that exists between the nations of the world. Students should learn about proper use of cutlery while dining. Napkin should be placed on the lap as soon as one is seated. Knife and spoon should be placed on the right, while fork should be placed on the left hand side. One should eat neatly and avoid talking while eating. One should also avoid placing elbows on the table. After finishing the dinner the fork & spoon should be placed upside down to indicate that the dinner has finished. This project taught the students that Good table manner are an important skill for kids which must be followed.

Environment

**HAKHA ELEMENTARY SCHOOL,
DAEJEON, SOUTH KOREA**

This project is a step to make our students aware about their surrounding in the global perspective. The ISA project 'Environment' has helped them to develop a good understanding of the concepts like global warming, green house effects. This project will help our students to develop friendly relation with our Korean partner school and to do comparative study of the environmental issues of India and Korea.
